

Eye Carámba!

It's time for FlutterGuard.™

If your eyes do the rumba while reading pressure gauges, it's understandable. Because, let's face it, regular gauges have a lot of pointer flutter. So much, in fact, it's hard to get an accurate reading. And all that extraneous motion puts excessive wear on gauge internals. So what's the answer?

Ashcroft® gauges with FlutterGuard™
FlutterGuard provides smooth, steady

pointer motion making Ashcroft gauges easy to read and longer lasting. You get performance similar to a liquid-filled gauge without the worry of potential leakage.

And no fill reduces weight and shipping costs.

So if you want to waltz instead of rumba, call the Ashcroft ActionLineSM for a free demo: 1-800-328-8258 and select the "factory sales office" option.

Ashcroft Gauges with FlutterGuard. No Fill, No Flutter... No Foolin'.
